Capture settings

Data source

- (•) Synthetic demo
- ( ) Live capture
- ( ) PCAP file

Maximum packets

100

Capture duration (seconds)

8

Live capture requires Npcap on Windows or suitable capture permissions on Linux.

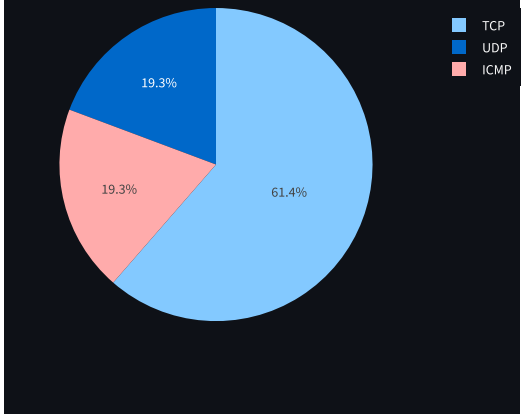

Do not capture other people's traffic or upload private PCAPs.

PacketSentry

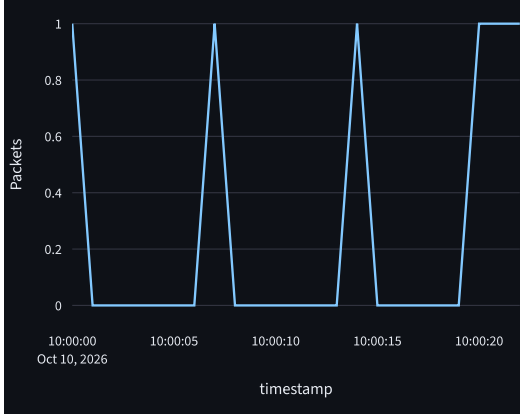

Showing synthetic training data. These records are not live traffic.

Packets analyzed	Unique source IPs	Protocols	Potential alerts
57	3	3	0

Protocol distribution

Packets per second

Detection alerts

No configured rules matched this dataset. This does not prove the network is safe.

Packet records

timestamp	src_ip	dst_ip	protocol	src_port	dst_port	length	tcp_flags
2026-10-10 10:00:0	192.168.56.20	93.184.216.34	TCP	51000	443	64	PA
None	192.168.56.10	192.168.56.1	UDP	53001	53	128	None
